Appearance and finish

Color	White

Materials

Material	ABS plastic, stainless steel

Mechanism and operation

Dispensing type	Manual
Activation type	Elbow-operated
Closing Mechanism	None

Dimensions and weight

Capacity (ml)	500.0 ml
Height (mm)	320.0

Width (mm)	94.0
Depth (mm)	160.0
Weight (kg)	1.2 kg

Mounting and connections

Mounting method	Wall

Warranty

Warranty (years)	2
Warranty Type	door-to-door

Logistics – unit carton

Carton weight	1.3 kg

Logistics – master carton

Units per master carton	12
Master carton height	300.0 mm
Master carton depth	680.0 mm
Master carton width	480.0 mm
Master carton volume (m^3)	0.098
Master carton weight	13.0 kg

Description

Faneco MED 500 ml is**manual elbow dispenser designed for liquid disinfectants**. The design allows you to activate the pump with your elbow, so the user does not have to press the dispenser with his hand. This is a practical solution for places where hand hygiene is particularly important.

The model is equipped with**short dosing arm**, thanks to which the entire structure remains relatively compact. The 500 ml capacity will work well where a large, liter tank is not needed.

- **Operation with elbow**– allows you to take the preparation without pressing the dispenser with your hand.
- **Short arm**– more compact design, suitable where a longer lever is not needed.
- **Capacity 500 ml**– a smaller tank allows you to reduce the size of the entire device.
- **For liquid disinfectants**– dispenser designed for hygienic dispensing of hand disinfectant.
- **Adjustable dose 1–3 ml**– allows you to adjust the amount of the preparation administered during one use.
- **Two ways of refilling**– the preparation can be poured**directly from the canister or use standard DIN28 cartridges**.
- **ABS and stainless steel construction**– combination of plastic with steel elements.
- **Matte finish**– neutral appearance suitable for professional sanitary spaces.
- **Wall mounting**– the dispenser can be placed directly at the disinfection station.
