Description

Folding shower seat with a white polypropylene seat, made of stainless steel, aluminium and polypropylene. The folding design allows the seat to be raised to a vertical position when not in use, helping to save space in the shower area. The seat surface is designed to provide improved grip in wet conditions.

The seat is designed for wall mounting and is secured with 10 screws. The construction uses 1.5 mm thick steel, with steel components joined by TIG welding. The maximum load capacity is 120 kg. When unfolded, the seat measures 180 × 480 × 400 mm.
