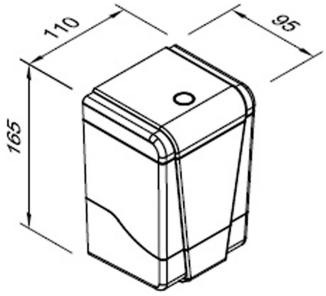
Touchless, automatic Faneco JET disinfection liquid dispenser 700 ml, transparent, ABS

Code: SA700PWWT
EAN: 5901764295341



The Faneco JET touchless disinfection liquid dispenser is made of ABS plastic in white and transparent colors. The device has a 700 ml tank and an automatic dosing system activated by a photocell when the hand approaches.

Technical information

About the product

Collection	JET
Product type	Disinfection liquid dispenser, touchless, for intensive use
Category	Soap and liquid dispensers
Brand	Faneco
EAN	5901764295341

Refills and consumables

Liquid type	Disinfection liquid
Refill system	From a canister

Features and functions

Additional features	Object detection indicator under the dispenser
Drip-free	Yes
Inspection window	Yes

Appearance and finish

Color	White/transparent

Materials

Material	ABS plastic

Mechanism and operation

Dispensing type	Automatic
Activation type	Sensor
Closing Mechanism	Lock + plastic key

Dimensions and weight

Capacity (ml)	700.0 ml
Height (mm)	165.0mm
Width (mm)	110.0
Depth (mm)	95.0mm
Weight (kg)	0.43 kg

Power supply

Power supply	4 AA alkaline batteries, 1.5V or 6V1A (DC) cable
Battery type	AA
Battery indicator	Yes

Mounting and connections

Mounting method	Wall

Warranty

Warranty (years)	2
Warranty Type	door-to-door

Logistics – unit carton

Carton weight	0.505 kg

Logistics – master carton

Units per master carton	30
Master carton height	525.0 mm
Master carton depth	395.0 mm
Master carton width	385.0 mm
Master carton volume (m^3)	0.08 m^3
Master carton weight	16.0 kg

Description

Faneco JET is**touchless dispenser for disinfectant liquid with a capacity of 700 ml**, which automatically administers the preparation when the hand is brought close to it. Not having to touch the device makes it easier to maintain hygiene and makes the dispenser work well in places used by many people every day.

The transparent tank allows**immediately see the amount of the remaining preparation**, without opening the housing. The dispenser also offers the ability to adjust the dosing time and two power supply options.

- **Touchless dispensing**– a photocell activates the dispenser automatically when you approach it with your hand.
- **Capacity 700 ml**– suitable for regularly used hand disinfection stations.
- **Transparent tank**– the liquid level is visible from the outside, so the operator can quickly check when it is necessary to refill the preparation.
- **Dosage regulation: 0.5 s / 1 s / continuous mode**– allows you to adjust the amount of the preparation administered to your needs.
- **Sensor range 0–6 cm**– the preparation is administered after detecting a hand directly under the dispenser.
- **Non-spill valve**– limits dripping of the preparation after dosing.
- **Filling from a canister**– the dispenser does not require the use of dedicated disposable cartridges.
- **Low battery indicator**– informs about the need to replace the power source.
- **Object detection indicator under the dispenser**– signals sensor operation.
- **Two ways of power supply**– the device can work on**4 AA 1.5 V alkaline batteries**or with power supply**DC 6V/1A**.
- **Up to 150,000 work cycles**– large number of cycles planned for the device.
- **ABS plastic housing**– light construction in white and transparent color.

Product code: SA700PWWT
Faneco

- **Key lock**– secures access to the inside of the dispenser.
- **Compact dimensions: 165 × 110 × 95 mm**.
- **Degree of protection IPX1**.

Faneco JET 700 ml is a practical solution for creating touchless hand disinfection stations in schools, kindergartens, offices, service facilities and other public spaces. Automatic dosing reduces the need to touch the device, the transparent tank makes it easier to control the liquid, and the ability to choose the power supply method allows you to adjust the dispenser to the installation location.
